ENGAGEMENT MODEL

DISCOVER	Operations deep-dive, bottleneck map
BUILD	AI systems, CRM, web, quote tools
TRAIN	Staff enablement, SOPs, knowledge bases
ADOPT	Handoffs, escalation paths, ongoing refinement

PROFILE

Fractional consultant who helps businesses grow revenue and cut costs by eliminating bottlenecks across marketing, appointment setting, sales, and operations. The method is one package: he maps bottlenecks, builds practical systems by directing AI tools (Claude Code, GPT/Codex), documents workflows, and trains teams to use them — so engagements end in adoption, not a handoff of unfinished tools. Fifteen-plus years across media, marketing, and operations (since 2008); eight years running marketing and CRM systems at the 365 brands before the current consulting work, so the process thinking predates the AI layer. Client work spans real estate, home services, and dealer/distributor businesses.

SELECTED ENGAGEMENTS

Artificial Turf Maintenance — AI Intake & Qualification System (2026)
Situation: the owner's wife ran the whole business and was overwhelmed by lead handling. Discovery: the company does no on-site consultations except repair jobs, so qualification and information collection had to happen before any quote. Build: a conversational AI chatbot that starts the moment a lead arrives — qualifies the customer, collects needed information and photos, and delivers them quote-ready. Outcome: the intake half of her job — marketing-side qualification and information collection — runs automatically. The owner would vouch for this work.

The Bauer Group — AI Systems & Agent Growth (2026–Present)
Discovery across recruiting and agent operations. Built: agent training portal (lessons, slide decks, SOP library), a source-grounded AI mentor that answers from verified sources with citations and routes exceptions to the broker, a multi-channel organic recruiting system across email, Facebook, Instagram, and LinkedIn (targeting screens, contact rules, booking verification, pre-call briefs), a partner resource hub, a project tracker, and social content apps. Training and adoption: agents and staff coached on practical AI use; adoption built into every deliverable.

Agency Logics — COO, Client Systems & Delivery (Feb 2026–Present)
Leads client operations and delivery for home-service dealer/distributor businesses. Built: a photo-to-rendering turf visualizer and a 3D pergola configurator (concept + rough estimate), pool/HVAC/kitchen demo tools, and conversational AI (SMS/voice) for lead qualification and booking.

EverBlade Turf and Designs — SEO / AEO / GEO Program
Full search-visibility program: end-to-end site optimization, a built-out article program, and listings and backlinks across Google Business, Yelp, Houzz, Angi, Apple, and Bing.

365 Brands — Lifecycle & Marketing Systems (2018–Present)
Eight years inside multi-brand home-service businesses: the complete GoHighLevel lifecycle program (acquisition, qualification, booking, nurture, retention, re-engagement, referral), a W-2 marketing team managed across media, design, social, and advertising, and early conversational-AI implementation — prompt-engineered an Air AI voice platform that qualified customers and booked appointments into the CRM.

CAPABILITIES

SYSTEMS — AI and revenue operations	Agentic workflows, AI assistants, voice AI and conversational AI, knowledge-base design for AI agents prompt engineering, GoHighLevel pipelines, lifecycle automation, lead routing, calendars, reporting
